Tech-Class is different. We focus on the "T" part of STEM and have the only program that focuses exclusively on "TECHNOLOGY".

How Tech-Class Works

Tech-Class is a way to prepare students for tomorrow. Throughout the year, we will cover the modules listed below. Each one runs a series of weeks, where we implement a vetted and thorough curriculum. We start small, carefully avoiding presumptions about the child's knowledge, and build their understanding/skill in an accessible step-by-step process. **Please note: Each semester will conduct modules distinct from the other semester. Material will not be repeated.**

ALL NEW CURRICULUM!

This year brings a completely new set of modules covering entirely new subjects for Tech-Class!

Modules we will cover this year :

*Please note: Each semester will cover distinct modules and will be different from the other semester
Material will not be repeated during the year or covered in the other semester.*

Cyber-Security and Cyber-SAFETY: What skill is more valuable today than understanding how to be secure and safe? This module will teach students safety, best practices, what hacking is, how it's done, how to stop it and more!

Digital Assistant/Artificial Intelligence: Alexa, Google Home, Siri and even Cortana are in our homes and working with us. But what are they and how do they function? We'll explore the ways to get the most out of them and figure out what's actually going on!

ART-Tech: Tech and Creativity go together like chocolate and peanut-butter! We will learn to control and command (program) robots to bring unique drawing creations into the world, rock 3D pens, control a drone making art and even make an ART-APP!

Music Tech: Our budding Mozart DJ's will learn how to record, edit, and manipulate that which speaks to the soul: song.

Pic-Tech: In everyone's hand, there is a device ready to capture the world! A Photograph is literally a drawing of light. Imagine, capturing light! Our Photographers will learn the science of photography as well as the art and master the TECH!

Health-Tech: Finally, the chance to improve our bodies as well as our minds! We'll explore how we can use TECH to physically better our lives.

Buy-Tech: How did Bezos get Amazon to zig when everyone else wanted to zag? Our students will learn what goes into E-Commerce and even get it to work
